Dimensions |AM

central operating aspects _
'central-operating-system':

1-Orientation Perspective

_ nyilatkozat manifesto

_ rámutatás indication

_ elrendelés enactment

_ rendezés settlement

_ kimutatás proving

_ összegző overview

↵ participation in specific domains, promoted-by:

=mail strategy

=tasks for distributed cooperations

=scheduled priorities of permissionless economy

↔ CSD environment

2-Repositories

_ policies for repos

_ portfolio management

_ content management

↵ 'dev linkchains', emphasized items, scaled-by:

=create/manage federated open spaces for IT | HW collaboration

=develop the workflow for hardware adaptations

⇔ CSD environment

⇔ KFI environment

diversified operating aspects _
'cooperative-operating-system':

3-Institutional legitimacy

_ legitend-1 |for constitution

_ legitend-2 |for optimization:

\marketing ; \operation ; \process ; \workflow

_ Performance Unit

DISTRIBUTION

=create/manage federated co-work spaces for DSI | OSPO processes

⇔ PDCA environment

4-OSPO | OSHW | DSI

_ challenges within peer production networks

_ commons-based peer production

_ digital social innovation

_ Dedicated tasks and Instruments

DISSEMINATION

=connecting/developing self-structured work spaces for manufacturing processes

=connecting/developing self-structured work spaces for legal purposes

⇔ PDCA environment

5-Self-administration structure

_ circles-am4ideahu

_ distributed cooperative organisations

_ practices used for digital self-determination

_ Process developer cumulative Framework

NETWORKING

=distributing general aspects for manufacturers'/entrepreneurs' processes

=these general aspects represented by OS/CC licensed parts (under all circumstances)

⇔ PDCA environment

1-a

Relevant items at 'ADOPT' - 'CONVERSION' - 'ADAPT' Stages:

- essential element:
- building blocks of initiatives and scopes of venture
- bylaws:
- it is like the owners manual for a cooperative business action
- environmental element:
- legitimate and manage the worker cooperative
- emphasized element:
- scale the actions and domains of cooperatives

Eljárásmódok:

- követő -aktív

- követő & formáló -proaktív
- reaktív & regeneratív -reakciós

m.a.d. Transparency

Entities

Boards

Info-records for Transition

Governance -for institutional legitimacy

this aspect regards the decision-making model of the firm/organisation; and mechanisms, political rules of participation in the digital platform

Economic model -for institutional legitimacy

this aspect regards the financing model which based on private capital, ethical finance or:

a distributed fund

how far profitability is driven through the whole plan

distribution of value generated

the business models, mechanisms of economic transparency

equity payment and labor rights

Knowledge policy -for Base of Intellect & Knowledge Exchange *KIB*

this aspect regards the property type as established by the license used for the content and knowledge generated

it also regards guaranteeing the portability of data and reputation

privacy awareness

protection of property, personal data

Technological policy -for Trusted Partner Network *VPT*

this aspect regards the mode of property and freedom associated with type of software used and its licenses

it also regards the model of technology architecture:

distributed...

centralized...

Social responsibility -for Trend Core Am4ideahu *TrendKÖZ(y)*

this regards to any source of awareness and responsibility
