_authority

A| emphasized in the mainframe:

A|1 .1 FIELDS OF PUBLIC RELATIONS

kommunikációs eszközrendszer (-célok)

- developing a legal framework for networking
practice-table of K.I.B.
- connecting to cooperate better
practice-table of K.I.B.
- making business relations
practice-table of K.I.B.

A|2 .2 AUTHORITY

hatáskör

- K.I.B. directories
info-table
practice-table of K.I.B.
- 'Shared Modules'
practice-table
- 'User Interfaces'
practice-table

A|3 .3 MANAGEMENT AREAS

ügyek rendszere

- Communication mgm
practice-table
- Ecosystemic mgm
practice-table
- Environment/Users mgm
practice-table

- Integration mgm
practice-table

A|4.4 DOMAINS

tárgykör

- need to design & develop online platforms for social innovation diffusion
- creating an ENABLING Environment
- offering FLEXIBLE Entries
- ensuring the VISIBILITY of adaptations

A|5.5 SPECIALTY

szakterület

- culture of participatory, driven by:
- 'Ports of Files' -PoF- (a mechanism for AM4ideaHu)
köz-kapcsolati tartományon értelmezett konstrukciós állományok
- 'Ports of Spaces' -PoS- (a mechanism for AM4ideaHu)
köz-kapcsolati tartományon értelmezett hálózati csomópontok
- culture of participatory, processed by:
- **"distributed circles"** through evolving interactions
online rendszerben adott közreműködői hálózat közös feladatcsoportjai
- **'boards (W-A-C)' as brand-based resource** to manage 'repositories' as a marketed construction
piac és közreműködők számára a gazdasági tevékenységet megjelenítő virtuális környezet
- quality assurance in prosumer manufacturing and production
- **promoting open and distributed design processes**
nyílt rendszerű tervezés és kivitelezés feladatcsoportjai
- **peer to peer empowered digital solutions**
alulról szerveződő közösségi tervezés és kivitelezés

B| divided in the framework

Every steps which can move us from push economy to pull economy.

"Pull economy has the ability to have demand instead of supply as main driver of economic development!"

B|1 DIGITAL SOCIAL INNOVATION means observing four overarching technology trends

1. openDATA
2. openHARDWARE
3. openNETWORKS
4. openKNOWLEDGE
 - **factor\1** (in the initiation phase)
sustainable communication infrastructure:

1_ operational parameters

|recorded and saved on hackMD

:

2_ development stages - open for discussion

|recorded and saved on hackMD

:

3_ **program fields**

|published on wiki/blog page

:

4_ **knowledge hub & notes documented**

|shared on contributory channels

:

5_ **content targeted the developer communities**

|shared on peer-to-peer platforms

:

6_ **present general, actual news**

|recorded and saved, resp. published on self-organised pages/wikis

:

.

- **factor\2** make and manage a source code repository:
- *the 'Contributors' Data Collection' (CDC) contains:*
- database of 'repositories'
(services, methods)
- database of "distributed circles"
(main activities in the common interest)
- library of nodes
(chronologically sorted items, ordered by a script)
- library of Program Office
'Unified Libraries' (UL)
- **factor\3** make and manage a project wiki:
|wiki of releases - this means some repositories, which distributed in many pages and contains various processes|
- Legitimation topic
|task: adopt self-governed processes
- Legitimation topic
|target: set the self-governed infrastructure of AM4ideaHu
- toolkit and policy shop
-initiate the wholescope of AM4ideaHu-
- working files for initiation
-objectives-
- **main objective\ 1** by Pointers
- tasks collected *-in nodes-* to create marketable actions

- **main objective\ 2** by Resources
- fields of open discussion: *'How to utilize the resources?'*
- **main objective\ 3** by Schedules
- review the whole concept to perform economical activities accurate
- **main objective\ emphasized sources**
- the "distributed circles"
-accumulate values to **make exchange values by conversions-**
- **granularity of tasks**
- this means limited size and complexity:
- a Framework defined to set 'boards (W-A-C)' for marketed actions
- labour-labile: **Board as Control**
- actions diversified:
- Specialisation
(where is market-first)
- Facultation
(where is labour-first)

B|2 DIGITAL SOCIAL INNOVATION means attention to initiatives

1. which have a SOCIAL IMPACT
:
2. which adopt NEW TECHNOLOGY TRENDS in a novel way
:
3. which aim to empower citizens for INDIVIDUAL and COLLECTIVE AWARENESS
:
4. which demonstrate a CLEAR NETWORK EFFECT
:
5. which focus on supporting and WORKING WITH GRASSROOTS or 'BOTTOM-UP' COMMUNITIES OF USERS
:
